

SEMINAR SERIES: INTERNET OF THINGS WITH DATA SCIENCE

23 November 2017 (Thursday)

12:30 — 13:30

Room N102, Hang Seng Management College

Guest Speaker:

Dr. Selina NG

Postdoctoral Fellow

Centre for Systems Informatics Engineering

City University of Hong Kong

Dr. Selina Ng is a Postdoctoral Fellow at City University of Hong Kong. Previously she was the Data Scientist in a start-up called OneSky Inc.. Prior to her time at OneSky, she was a Senior Engineer in Data Analytics at the Hong Kong Applied Science and Technology Research Institute (ASTRI). Dr. Ng has over ten years of work experience, including five years applying data mining to extract insights for decision making.

Seminar Abstract:

The Internet of things (IoT) is the network of physical devices, vehicles, home appliances, and other items embedded with electronics, software, sensors, actuators, and network connectivity which enable these objects to connect and exchange data. Data Science is about extracting knowledge or insights from data. This seminar will focus on the use of RFID and online data in previous industry analytics project(s).

OPEN TO PUBLIC
